

Carbon Reduction Plan

Supplier Name: Town and Country Cleaners Limited

Publication Date: January 2025

Commitment to achieving Net Zero

Town and Country Cleaners Limited is committed to achieving Net Zero emissions by 2050.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2024	
Additional Details relating to the Baseline Emissions calculations.	
<ul style="list-style-type: none">• Scope 1 Baseline Emissions are based on mileage and fuel consumption figures from company fleet of diesel and petrol vehicles. The company does not own and property, and operated from rented office space• Scope 2 Baseline Emissions calculated from Electrical Energy usage in office facilities• Scope 3 has no prior Emissions reporting due to insufficient data. This will be accumulated during 2025

Emissions reduction targets

In order to continue our progress toward achieving Net Zero, we have adopted the following carbon reduction targets.

We project that carbon emissions will decrease over the next five years to 151 tCO₂e by 2030. This is a reduction of 15%.

Progress against these targets can be seen in the graph below:

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been completed or implemented since the 2024 baseline.

There are a number of measures currently in place that will have a positive impact on our Carbon Reduction Plan. We will be able to report on the reductions achieved in our next reporting year.

- We are accredited with ISO14001
- We have fitted trackers to our company products to reduce volumes for delivery and packaging
- Office lighting has been replaced (in 2024) with energy-efficient lighting

In the future, we hope to implement further measures such as:

Proposed future Carbon Reduction Plans include:

- Transition to Concentrated Cleaning products to reduce volumes for delivery and packaging
- Implementation of Refillable Cleaning systems, with re-usable bottles filled from bulk containers
- Sourcing products that are packaged in recyclable or bio-degradable materials
- Managing Supply Chain to reduce Carbon footprint and request for Environmental Reports
- Provide Employee Training Modules on Environmental Considerations in the Workplace
- Provide Additional Training for Employees to Implement Best Practices at Home
- Improve Tracking, Monitoring and Reporting of all Waste Generating Processes
